

## Participation Application

### It Takes a Community: Employment Support Service Providers

Recommendations from the Employment Support Services Report include establishing a community stakeholders group to develop a plan for the Gaps/Issues identified and to build on preliminary Ideas/Solutions. Over 70 support service representatives participated in the forum. We recognize it is not practical to have a committee this large to move forward. We are seeking 2 people who can bring the perspectives from each support sector group that participated (Employment/Career Supports, Education/Training Supports, Financial Supports, and Community Supports).

The participants at the forum identified the involvement of employers, adjustment committee representatives, and government (municipal, provincial and federal) representatives is required to move forward. We will contact appropriate representatives from these sectors/organizations to take part.

Please take a few minutes to answer the questions below and fax or mail your interest application to:
